

Web programming

Week 4

Page Layout

Layout types

Card style and grid based style- the most & the adaptive

Grid (1990s) - table based layout (accurate grid), visual balance, 12 or 16 columns.

Split-screen style (2016) - equal weight (33:66 or 40:60 ratio)

Big topography - more popular in mobile version (large format headings), other absent

Magazin style - for large content (online magazine, newsletters)

Personalization - algorithms (AI)

P.S. I got this list from Lecture 4 materials

Assignment

Create Web site using one of Layout types.

Web site must include 3 pages (but if you choose **Magazin style** you can create only one page with a large content)

- the 1st page is a Homepage
- the 2nd and 3rd ones of your choosing

You must use external CSS file.

Deadline: 02/10/2022 22:02
